

SRIDHA SAHA

Staff UX Writer | Content Design & Content Strategy

India • +91 8336020118 • sridhasaha98@gmail.com • [Portfolio](#)

SUMMARY

Content Designer and UX Writer with 7+ years of experience leading content strategy, content systems, and product content across web, SaaS, and AI-powered experiences. Proven track record building reusable content patterns and design systems, from UI microcopy (error messages, toasters, contextual guidance) to prompt design for LLM-driven agents, that scale consistency and quality across large product surfaces. Deeply cross-functional: partners with Product, Design, Engineering, Research, and Support teams from problem definition through implementation, presenting content and design work to executive stakeholders to drive alignment. Grounded in user research, including usability testing, session-recording and heatmap analysis (FullStory), surveys, and voice & tone research, to translate ambiguous problems into clear, trustworthy language and measurable product outcomes.

EXPERIENCE

Senior UX Writer / Content Designer, Insider, Istanbul (Remote)

May 2021 – Aug 2026

- Own content design across Insider's SaaS product, including onboarding, integrations, user flows, contextual guidance, error messages, and tooltips. Work closely with Product Managers, Designers, Developers, CSMs, and Technical Account Managers from problem definition through implementation.
- Present content strategy and design work to executive teams and senior stakeholders, building consensus on content recommendations across cross-functional projects.
- Built and maintain Insider's content design system, including a library of reusable UI content patterns such as toaster notifications and error-message patterns, plus content guidelines that balance user needs, business goals, and technical constraints.
- Design prompts and fallback flows for Insider's AI-powered shopping and design agents, structuring LLM-driven, guided-selection conversations around the most-asked user factors so people can act without writing their own prompts.
- Created reusable, automated prompt templates so cross-functional teams could generate on-brand, consistent copy on their own, cutting down bottlenecks on the writing team.
- Lead user research end to end, including usability testing, surveys, voice & tone research, and value research. Regularly review FullStory session recordings and heatmaps to find where users hit friction and validate content decisions with evidence.
- Translate research and behavioural data into content strategy, user journeys, mindmaps, and process flows that improve usability, engagement, and retention.
- Created an end-to-end onboarding content experience for product integrations, combining concise in-product guidance with supporting content. Reduced workload for onboarding and integration teams by 40%.
- Run recurring product-panel content audits to catch inconsistencies, gaps, and discoverability issues, and to prioritise systemic fixes over one-off edits.

Product Marketer, WebEngage, Mumbai

Jan 2021 – May 2021

- Led website and product communication across release digests, product blogs, product education, and customer-facing channels.
- Partnered with Product and Technical teams to translate complex product requirements into clear customer-facing experiences and support major feature releases.
- Used user journeys and behavioural analysis to identify opportunities to improve engagement and retention.
- Ran recurring website/content audits covering quality, crawlability, SEO, metadata, and overall experience.

Technical Writer, WebEngage, Mumbai

Jul 2020 – Dec 2020

- Managed Knowledge Base and Developer Documentation for clients including Nykaa, Golbibo, Go-MMT, and Hindustan Unilever.
- Translated complex product integrations and technical workflows into accessible documentation, processes, infographics, and supporting content.

- Collaborated with technical teams on product capabilities including 'Paths', an analytical heatmap of user events.
- Created content that contributed to a 40% reduction in onboarding and integration workload.

Associate Product Manager, Workex, Bengaluru

May 2019 – Jul 2020

- Wrote performance and brand copy across paid and organic channels, including YouTube ads, Google ads, social media and in-app banner creatives, and App Store and Play Store descriptions, supporting user acquisition and installs campaigns.
- Wrote video scripts for influencer partnerships, translating product positioning into creator-friendly, audience-first messaging.
- Managed a team of 8 content writers, shaping content and communication strategy across the user journey on app and web.
- Partnered with the Data team, analysing Kibana and Google Analytics data to study conversions, engagement, and product performance.
- Wrote notification copy and designed notification-journey logic across push, SMS, WhatsApp, and email, optimising communication costs and contributing to a 10x increase in revenue.
- Ran a reward campaign that increased daily installs from 1,000 to 7,000 and doubled performance of key app actions.

CORE SKILLS

Content Design: UX Writing • Content Strategy • Content Systems & Design Systems • Content Principles, Guidelines & Style Guides • Messaging Frameworks • Product Content • Microcopy • Voice & Tone • Content Patterns (Error Messages, Toasters, Contextual Guidance) • Information Architecture • Content Audits

AI / Conversational: Prompt Design & Engineering • LLM-Driven Dialogue Design • Conversational Flows • Fallback Flow Design • AI Agent Content • Reusable Prompt Templates

Research: User Research • Usability Testing • Voice & Tone Research • Value Research • Surveys • Session Recording & Heatmap Analysis (FullStory) • Behavioural Data Analysis

Cross-Functional & Process: Stakeholder Collaboration • Cross-Functional Partnership (Product, Design, Engineering, Research, CSM, Support, Legal) • Executive & Senior Stakeholder Presentations • Design Crits & Content Reviews • Ambiguous, Fast-Paced Environments • User Journeys • User Flows • Process Mapping • Product Strategy

Tools: Figma • Miro/FigJam • Confluence • Notion • Jira • Trello • Asana • Google Analytics • Kibana • Hotjar/FullStory • Mixpanel/Amplitude

Languages: English • Hindi • Bengali
